AutoCAD is currently in its third version, and is the most widely used and accepted drafting and engineering software application, with over 16 million users and 17,000 registered users as of December 2015. CAD applications are used to prepare 3D design and drafting data for

---

manufacturers in industry. Most designers use AutoCAD to prepare 2D design, such as schematic and floor plan, as well as 3D design, such as space planning, architecture, engineering, etc. The main functionality of AutoCAD is to perform the following:

- Integration of 2D and 3D design.
- Creation of drawing documents.
- Rendering (rendering) of

Creation of 3D models.  
Geometry calculation,

AutoCAD MEP In addition to its use in architectural design and construction, AutoCAD MEP is also an automation tool for the mechanical, electrical and plumbing (MEP) field. MEP uses the technology behind AutoCAD to allow users to enter product data, create schematics, and supply bills of material. When

---

originally released as part of the Architectural Desktop suite in 1996, AutoCAD MEP allowed users to model the mechanical, electrical, and plumbing elements of buildings. Since its release in 1996, AutoCAD MEP has been updated and maintained to stay current with the latest technology. AutoCAD MEP is a different product than Architectural

Desktop, which is still used for architectural design and drafting. Architectural Desktop is limited to 2-D design and drafting. MEP adds the ability to create 3-D models and to support 2-D drawing data in the 3-D model. AutoCAD MEP can be used in conjunction with Architectural Desktop. See also Comparison of CAD
